Project description	Investor	Year
Main design of reconstruction of the local road Kardaglije L=1200m	EURO-ASFALT	2024
Main design of reconstruction (expansion) of the local road Kadraglija L=280m	EURO-ASFALT	2024
Main design of local road 26 with the main design of the culvert	CENGIZ INSAAT SANAYI VE TICARET A.S.	2024
Development of project documentation for the construction of I transversal – Kobilja Glava 1.CONCEPTUAL DESIGN OF CHANGES TO THE SECTION AND TRANSVERSAL FROM THE KOBILJA GLAVA TUNNEL TO THE CONNECTION TO M18 IN THE HOTONJ SETTLEMENT FROM KM 4+180.0 TO 5+100.00 Integration of the TZI project into the executed state of the tunnel (horizontal and level shift of the tunnel) Integration of the executed state of the tunnel into the roundabout in Hotonj (3 variants) Road above the tunnel – 2 variants due to the subsequently provided position of the gas pipeline Local road with stream regulation 3 variants in accordance with the level of the main route Intersection at the bridge 3 times in accordance with the level of the main route Main route variant with bridge Main route variant with footbridge Main route variant with otobridge Main route variant with underpass Stream regulation MINIMAL PROJUECT OF CHANGES TO THE SECTION AND TRANSVERSAL FROM THE "KOBILJA GLAVA" TUNNEL TO THE CONNECTION TO M18 IN THE HOTONJ SETTLEMENT FROM KM 4+180.00 TO 5+100.00 - ACCORDING TO THE ADOPTED CONCEPTUAL DESIGN Main route 920 m Service road 900 m Road through the underpass 130 m Underpass 40 m Intersection Stream regulation 890 m (758 m trapezoidal channel + 132 m box) 3.CONCEPTUAL DESIGN OF THE TUNNEL AND INTEGRATION WITH TZI AND IRGO PROJECTS Book A-1 Main route Book B-1 Tunnel drainage project Book C-1 Tunnel signaling Book C-1 Tunnel signaling	ELCOM d.o.o.	2024
regional road R 454 Main design of the official entrance from the M-5 main road, section: 008, Rogolji-Jajce, station km 22+450 in Mile, Municipality of Jajce	Tuzla ALM-TURIST D.O.O.	2024
Development of the project for the reconstruction of the local road Olovo - Zeleni		2222
Vir. L=1900 m	Olovo Municipality	2023

Development of a parking and business space project for a car rental agency and a taxi stand	PC International Sarajevo Airport	2023
Development of project documentation for the Medakovo concrete plant	EUROASFALT	2023
Preparation of project documentation for the construction of the highway on the Vc corridor, section Medakovo - Ozimice	Cengiz Insaat	2023
Soil testing and soil analysis of the access road for the landfill of material from the excavation of the Crni vrh tunnel for the need for the construction of the Vc Medakovo-Ozimice corridor highway	Municipality Tešanj	2023
Highway construction project on corridor Vc section Mostar - South Tunnel Kvanj	STRABAG	2023
Revision of the project: "The main project of the main road project for the transport of ore Rupice - Tisovci lot 2b." (route, drainage and culverts, signaling, facilities on the route and geology)	TZI Inženjering	2023
Revision of technical documentation (conceptual solution preliminary design and main design) for the project of creating a 3D model of the route and the project of noise protection on the motorway sections Drivuša-Kakanj and Kakanj-Visoko	Institut za građevinarstvo "IG" d.o.o. Banja Luka	2022
Development of the study for the highway section on Corridor Vc "Tunel Putnikovo Brdo 2 - Medakovo" Development of the study of the cleaning of the Bosna River at the Doboj Jug location	EURO-ASFALT doo Sarajevo	2022
Calculation of earthworks for the construction of an access road for the purpose of the WTG project Saudi Arabia	WindThink	2022
Development of project documentation for the road in the Dugandžići settlement L=120 m.	Općina Olovo	2022
Development of hydrotechnical and traffic part of the main design of reconstructs the intersection of the main road and the regional road R427, municipality of Stolac	JP Ceste Federacije BiH	2022
Revision of the project for the construction of the roundabout for the junction with R 455 Kakanj - Visoko (R 443 A1- Visoko-Kiseljak)	Ministrastvo za prostorno uređenje, promet i komunikacije i zaštitu okoline ZE- DO Kantonalna direkcija za ceste	2022
Revision of the main design of rehabilitation of the Misurići black spot, on the M17 road, section 005, Maglaj municipality, km 19+000	JP Ceste FBiH	2022
Revision of the main design for the rehabilitation of the Tatarbudžak black spot, on the M17 road, section 006, km 3 + 500, Žepče M unicipality	PC Roads FBiH	2022
Development of main design of motorway Ozimice-Poprikuše (Žepče jug) The total length of the motorway route on this section is approximately 12.8 km, on which there are 9 bridges from 30 to 406 m long. In addition to bridges, there are underpasses 9-11 m wide with lengths of 40 to 160 m. There are also two pipe culverts at the intersection with watercourses. The route also includes five tunnels from 225.00 to 770.00 m. Also, one bilateral (type 2) EIA (accompanying service facility) is planned.	PC Motorways FBiH	2021
Development of drawing for access roads towards TSF	Eastern Mining d.o.o.	2021
Preliminary and Main design of the road from the settlement of Rupice to the settlement of Tisovci L = 25 km	Eastern Mining d.o.o.	2021
Preliminary design of the Sarajevo expressway, section Stup (Briješće) - Buljakov Potok-Buća Potok-Pofalići Development of the main design of the section Stup (Briješće) -Buljakov Potok-Buća Potok	PC Roads of FBIH	2021
Revision of the main design of the GGM suburban highway (Bojin vir-new Drivuša bridge) Phase I in the length of approx. = 1,308.67 m	PC Zenicagas	2021
Development of Preliminary design for optimization of project documentation on Corridor Vc, section Mostar South - Tunnel Kvanj for the needs of tender documentation (PHASE I) which includes: • optimization of the construction project of the main route and • construction projects of engineering structures, as well as review and, if necessary, optimization of other phases	STRABAG d.d.	2021

Design documentations within design of motorway on Corridor Vc, section Poprikuše - Nemila development of Preliminary design, Main design, As-Built design, for all the Works including any other documents necessary to instruct the Contractor's Personnel, Design Supervision, for Design documentation within design of highway Corridor Ve: Section Poprikuše -Nemila:

LOCAL AND OTHER ROADS

- Civil Engineering Design of relocated road Local Road 1 (deviation of local road under viaduct)
- Civil Engineering Design of new road Local Road 2 (road to Begov Han)
- Civil Engineering Design of new road Connection Road from M17 to toll station including roundabout
- Civil Engineering Design of service road tunnel entrance
- Civil Engineering Design of service roads tunnel exit
- Civil Engineering Design of service roads approach to cemetery
- Civil Engineering Design of disposal areas with the network of access roads

CENGIZ INSAAT 2021 SANAYI VE TICARET A.S.

TRAFFIC EQUIPMENT AND SIGNALIZATION

- Design of horizontal traffic signalization of motorway and other roads
- Design of vertical traffic signalization of motorway and other roads
- Design of structure for traffic signalization on motorway and other roads
- Design of traffic equipment guardrail and impact energy absorbers/crash cushions
- Design of traffic equipment protective wire fence

ENVIRONMENT PROTECTION AND LANDSCAPING

- Landscaping design of main alignment, interchange, TS and TCC, disposal area
- Design of temporary Site Facilities Exterior arrangements and roads

and roads		
Main design of the road as part of the preparation of technical documentation for the reconstruction of the regional road Berane - Trpezi - Kalače, length approx. 7.00 km	PROFIL ING d.o.o. Monte Negro	2021
Consulting services for Project Management on the construction of the highway Vranduk - Ponirak - Lot 2 Team for project implementation in the control of the implementation of FIDIC contracts "Contracting conditions for construction works" - (Red book ", first edition 1999) for the construction of the motorway on Corridor Vc, section Nemila - Donja Gračanica	INSTITUTE FOR CONSTRUCTION IG d.o.o. Banja Luka	2020
Main design for the reconstruction of the road M16.4, section Novi Travnik - Bugojno, passage next to BNT	PC Roads FBiH	2020
Main design for the extension of Džemala Bijedića Street with the connection of Dr. Silva Rizvanbegović Street to Džemala Bijedića Street and the access road to the business building	BLOK D.O.O.	2020
Development of Preliminary or Main design for construction and reconstruction of roads, streets and pedestrian paths in the Government of the Brčko District of BiH LOT 1 - Preparation of Preliminary and main projects for construction and reconstruction of roads with open stormwater drainage system in the length of 0-500 m LOT 2 - Development of preliminary and main projects for the construction and reconstruction of roads with an open stormwater drainage system in the length of over 500m LOT 3 - Development of preliminary and main projects for the construction and reconstruction of streets with a closed stormwater drainage system in the length of 0-500m LOT 4 - Development of main projects for the construction and reconstruction of pedestrian paths in the length of 0-500m	Government of Distrikt Brčko	2020
Development of preliminary and main road designs for 2020l - Development of the main project of the local road Briznik - Mošćanica	PC FOR SPATIAL PLANNING AND	2020

Preliminary and Main design infrastructure and external design of University Sarajevo — Part C-1 Marijin Dvor 1. Preliminary design of complete infrastructure and landscape 2. Preparation of a supplement to the geodetic survey of the given scope with a presentation of the existing infrastructure and horticulture, with the preparation of a geodetic study 3. Research geological - geomechanical works and preparation of studies on soil characteristics with conditions for design 4. Development of main projects: 4.1. Traffic plan and project of the complex, solution of drainage, horizontal and vertical signalization 4.2. Levelling plan of the complex 4.3. Hydro installations: - Construction of devices and water supply systems with calculations, with system of irrigation of green areas and botanical gardens - Construction of devices and systems for surface and wastewater drainage with calculations 4.4. Heating: - Construction of devices and systems for heat supply and gas network with calculations 4.5. Electrical installations: - Construction of devices and systems for electricity distribution with public lighting, Construction of low voltage energy devices and systems with TK network and video surveillance 4.6. Exterior: Green and recreational areas, with valorization of existing greenery with urban furniture - system of environmental protection and other protections prescribed by law 5. Creating a composite plan 6. Design bill of quantities and estimate of works: by phases and total 7. System of consent and conditions for protections prescribed by the Law	Sarajevo University	2012
Main design of reconstruction of North city road in Tuzla, crossroads Music school and Tenis	Ministry of trade, tourism and traffic of Tuzla Canton	2012
Detailed design of road A transversal, detailed design of water supply of A transversal and detail design of rain waters and wastewaters	Ministry of traffic of Canton Sarajevo- Roads directorate	2011
Main project of reconstruction of regional road R-413b Gostilj-Dobrtetići-Jajce	Cantonal Directorate for Roads SBK	2011
Auditing of the main and detail reconstruction design of the regional road R-439 Novi Travnik-Gornji Vakuf/Uskoplje (Cantonal Road Directorates SBK)	Cantonal Road Directorates SBK	2011
Auditing of the main and detail reconstruction design of the regional road R-413b-Gostilj Dobretići-Jajce (Cantonal Road Directorates SBK)	Cantonal Road Directorates SBK	2011
Auditing of the main and detaild reconstruction design of the regional road R-440 Stara Bila-Han-Bila-Gluha Bukovica (Cantonal Road Directorates SBK)	Cantonal Road Directorates SBK	2011
Preliminary design of removing the existing buildings - Old high school building	Maglaj Municipality	2011
Main project solution for pedestrian traffic in tram station zone in Kasindolska- Rustempašina street	Ilidža Municipality	2011
Main road project and parking space project in Gradac - archaeological site Stari grad Gradac	Hadžići Municipality	2011
Main project of halls and parking space	AHUS d.o.o. Ilijaš	2011
Main project of the road and parking space of the road Košćan-Aleksići	Hadžići Municipality	2011
Fesibility study and preliminary designor highway Orašje (Sava river) –Tuzla (Šićki Brod) L=61 km LOT 1 Maoča-Majevica L=11,50 km	Faculty for Geology and Civil Engineering, Tuzla	2011

ID. 4200347270000 • FDV. 4200347270000 • IMBS. 05-01-0045-05		
Main project of the regional roads between two municipalities Visoko and Ilidža (Bandera) - Zenik - Stari Grad, 13:13 a total length of 5.037,07m which includes: Reconstruction of existing sections of local roads Rakovica –Zenik the length of 2937.07m Newly designed regional road Zenik - Trešnjica - Bandera length of 2.100,00 m	PE for Spatial Planning a nd Urban Design Zenica doo	2011
Main project of road and bridge on the river Neretva in Konjic	Konjic Municipality	2010
Main design of the reconstruction of the local road Vilenjača-Suljići Local Community Stijena and Donja Koprivna in Cazin Municipality	PE Communal housing Cazin	2010
Project designs for infrastructural facilities: Prliminary and main designs of the bridge alongside the existing bridge with a ramp, crossings, roads on M17 road as well as int he areo of mine river regulation Gostelja L = 150, reconstruction of parking for employees, horizontal road traffic project	Coal Mine Đurđevik	2010
Fesibility study and preliminary design for highway Orašje (Sava river) – Tuzla (Šićki Brod) L=61 km LOT 1 Maoča-Majevica L=11,50 km	Facutly for Mine, Geology and Civil Engineering Tuzla	2010
Main design of road Zukića Brdo along with run sanation of landslides Svrake geological-geotechnical investigation elaborate ofworks at the site of landslide Svrake	Vogošća Municipality	2008
Preliminary and main design of reconstruction of road Iza Gaja – Pogledine – Dolovi	Stari grad Municipality	2008
Preliminary and Main - detailed design and reconstruction of roads separate sewage sistem in the street Ahmed Rizve Vogošća with crossing the M5 highway and bridge project in Semizovac.	Vogošća Municipality	2008
Preliminary and Main - detailed design paving of Baščaršija square	Stari Grad Sarajevo Municipality	2008
Detailed design of primary roads in the scope of the regulatory plan of roads ul Mustafa Pintola, new bridge over the Railway (1000m road project, the bridge over the river Tilava, horizontal and vertical signalization, storm sewers, street lights)	Vogošća Municipality	2008
Detail design for the construction of roads and facilities for sport and recreation Park - Šume Hum 1. Reconstruction of the existing school road (Humska street), 2. Construction of roads special regime - in the landslide zone - G.Velešići street), 3. Building a ring road, 4. Reconstruction of the road for the tower, 5. The path for the sport and recreation, 6. Water supply, 7. Separate sewer system, 8. Public lighting, 9. Horticulture.	Novo Sarajevo Municipality	2008
Detailed design of the reconstruction of street Svetozar Ćorović (approximately 400 m ') with the reconstruction of existing crossings - bridges and regulation of Koševo Creek	Construction Institute of Sarajevo Canton	2007
Main design of road and Brigde over the river Stupčanica	Olovo Municipality	2007
Main design of fire path Kokošinjak - Čičevo, Spiljani - Lovnica, Ash- Donja Bara, Ljuta, Konjic Municipality	The City of Mostar	2006
Main and Detailed design of the local road Tršće – Ponijeri L=15,10 km	Ministry of Physical Planning, Transport and Communication and Environment, ZE-DO Canton	2005
Alternative solutions of technical documentation for the road Donji Vakuf-Srt- Ždralovići	Cantonal Directory for Roads Busovača	2005
Main-Detailed design of reconstruction of the road Nahorevo – Monument of nature Skakavac	Construction Institute	2005

	of Sarajevo Canton	
Main design of the organization of 11 road crossings over the rails Sarajevo- Zenica. Perin Han, Drivuša, Janjići, Slap, Gora, Kakanj, Čatići, Poriječani, Visoko, Banjer i Podlugovi.	AIDIA INŽENJERING D.O.O. Sarajevo	2005
Main project of the road and electrical signs inside planed changes of regulation plan Hrasno II	Novo Sarajevo Municipality	2005
Main Design to Ćumurija bridge – Čobanija bridge Walkway, in Sarajevo	The City of Sarajevo	2005
Fesibility study for highway Orašje (Sava river) –Tuzla (Šićki Brod) L=61 km LOT 1 Maoča-Majevica L=11,50 km	Cantonal Directory for Roads SBK	2005
Preliminary, Main and Detailed design of partial reconstruction and construction of the regional road R-481 Donji Vakuf-Prusac-Poriče, section Prusačka river-Srt- Ždralovačko crossing L=4 km	Cantonal Directory for Roads SBK	2005

-Landslide-

Project description	Investor	Year
Main design for landslide remediation on the regional road R 444, section Breza-Vareš, locality Šaš, municipality Breza	Cantonal Directorate for Roads Zenica- Doboj Canton	2017 2018
Main design of escarpment rehabilitation on two location in street Vladimira Preloga, Golo brdo	Novi Grad Sarajevo Municipality	2016
Geological study for main design of escarpment rehabilitation on two location in the street Vladimira Preloga, Golo brdo	Novi Grad Sarajevo Municipality	2016
Rehabilitation of the landslide zone on regional road R-468 Olovo-Sololac in part from km 0 +100 to km 0 +200 settlement Olovo Luke, Olovo municipality	Cantonal Directorate for Roads Zenica- Doboj Canton	2014
Main design of permanent rehabilitation of two landslides on regional road R444 Podlugovi-Breza-Vareš, site Kapija	Cantonal Directorate for Roads Zenica- Doboj Canton	2014
Main design of the road and sustaining wall in settlement Mlavica, Tarčin	Hadžići Municipality	2011
Technical project documentation for protection of construction pit for the construction of administrative and business center LAKE Lamella A Skenderija	Lake d.o.o.	2010
Mian design for landslide rehabilitation in Sapna Muinicipality	Sapna Municipality	2010
Main design for the regional road rehabilitation R471 Lukavac Banovići: - km 23+500 - km 25+700 - km 25+900	Road directorate Tuzla	2010
Mian design of the recovery of sustaining wall in Hadžićima street Hadželi, settlement Dupovci	Hadžići Municipality	2010
Mian design of the road in street Gornji Velešići in zone of landslide 250 m	Novo Sarajevo Municipality	2010
Main design of recovery of the road R-456 Priboj – Goduš, endangered by landslides 4+900,00 of highway M18.	Road directorate Tuzla	2009
Main design of the part of the road Zukića Brdo, Main design for recoveryof landslide "Svrake" and studies of geological - geotechnical site investigations at the site of landslide "Svrake"	Vogošća Municipality	2008
Main design retaining wall street Džeka - Municipality of Stari Grad	Stari Grad Sarajevo Municipality	2007

-Bridges –

Project description	Investor	Year
CONSULTING SERVICES FOR THE PREPARATION OF THE CONCEPTUAL AND MAIN PROJECT FOR THE CONSTRUCTION OF THE MOTORWAY SECTION MOSTAR NORTH – MOSTAR SOUTH MAIN PROJECT		
Structures (Engineering Constructions)	TRASA	2022
-Project for bridges and viaducts		
-Bridge 10 (Bridges/viaducts length 0-100 m) -Projects for main drainage and hydrotechnical constructions		
Study of the bearing capacity of the bridge	Eastern Mining d.o.o.	2021
Development of main design of the Ozimica-Poprikusa section of the highway (Zepče South), length L=11.99 km ENGINEERING STRUCTURES Preliminary design M4 bridge construction project		
M9 bridge construction project	PC Motorways	2021
Main design Construction projects of bridges and viaducts, textual part and drawings Bridge 4, right building (L=285.00m), left building (L=245.00m) Bridge 9, right building (L=497.00m), left building (L=527.00m) Construction project of supporting structures, reinforced earth structures and slope protection on the main route, textual part and drawings	FBiH	2021
Main design of the road bridge over the river Jablanica in the settlement Dugandžići	Olovo Municipality	2018
Investment - technical documentation for construction, reconstruction and other construction works of civil engineering structures LOT1: -bridges (concrete and steel) -roads (local, uncategorized and pedestrian and bicycle paths) -sports and entertainment facilities (outdoor sports and children's playgrounds)	Centar Municipality	2018
Supplement to the Main Project for the Rehabilitation of the Railway Bridge "Battle for the Wounded on the Neretva"	Jablanica Municipality	2017
Services for design planning for channel regulation of Trnava river with approaches from the Dallas factory and under the overpass highway in Blažuj	llidža Municipality	2015
Replacement of the steel structure rotator wagon No.2 in "Tuzla	PC Elektroprivreda BiH d.d. TE "Tuzla"	2015
Preliminary and Main design of foot bridge over the Miljacka river and foot path for approach to the bridge, as well as the development of geological findings	Novi Grad Sarajevo Muinicipality	2015
Preliminary design reconstruction of the bridge at Paljevska street Np.177 and drafting of the terms of reference	Novi Grad Sarajevo Muinicipality	2015
Main design for repair of destroyed bridge "Battle for the wounded"	Jablanica Municipality	2014
Main design for construction of pedestrian bridge over the river Bosna in Visoko, a town Luke-Ozrakovići	Visoko Municipality	2014
Main design for reconstruction part of the main road and a bridge over the river Zujevina	Hadžići Municipality	2013
Preliminary design of city road in Visoko section from new bridge in Prijeko until intersection near the bus station with the preliminary design of the bridge over the river Bosnia $L = 80 \text{ m}$	Visoko Municipality	2012
Study for Rehabilitation "Memorial Bridge" on the Neretva River in Jablanica	Jablanica Municipality	2012
Preliminary design of the road for industrial zone from intersection Rosulje to Industrial zones with solution for connecting road Izet Delić from pumps for liquid fuel to industrial zones with the preliminary design of the bridge over the river Vogošća, L = 20 m	Vogošća Municipality	2012

Detailed design of road A transversal, detailed design of water supply of A transversal and detail design of rain waters and wastewaters, Bridge over the river Dobrinja in Sarajevo at the intersection of transversals A and XI L = 23 m	Ministry of traffic of Canton Sarajevo-Roads directorate	2011
Main design of reconstruction of North city road in Tuzla, section: crossroads at the Music School - crossroads for Tennis with the main desing of the overpass in street Trnovac KM 0 + 700.00 northern city roads L = 45m	Ministry of trade, tourism and traffic of Tuzla Canton	2011
Main design of the reconstruction of the city bridge	Sanski Most Municipality	2010
Main design of the road and bridge on river Neretva in Konjic L=75 m	Konjic Municipality	2010
Preliminary and Main design of the footbridge over the river Trešanica in Konjic L=25m	Konjic Municipality	2010
Detail design od road and bridge over the river Tilava L=1000 M	llidža Municipality	2008
Preliminary and Main design of the bridge over the river Stupčanica in Olovo L=36m	MC Projekt doo	2007
Main and Detailed design of the bridge over the river Drina L=100m in Osanica in Goražde	Ministry for agriculture of Bosansko- podrinjski Canton	2006
Main and Detailed design of the bridge over the river Prače in Kaljani	Pale-Prača Municipality	2006

-Rail-

Project description	Investor	Year
Development of the project of the as built design of the industrial track		
for the Port of Brčko: BOOK I - As built design of the industrial track railway station Brčko Novo - port of Brčko BOOK II - As built design of fitting the railway (leg for Brčko Port) to the track on the part of the crane path along the bank of the Sava River Brčko Novo - Brčko Port BOOK IV - As built design of the AB slab on piles for fitting the railway line (leg for the port of Brčko) to the track on the part of the operational coast - the port of Brčko BOOK V - As built design of the overpass over Bijeljinski Road for the industrial track railway station Brčko Novo - port of Brčko BOOK X - As built design of the reconstruction of a part of the tracks in front of TUŠ	STRABAG d.o.o.	2024
Development of a study with a conceptual solution for the new railway Vareš- Banovići with alignment to the existing railways: Podlugovi-Vareš and Banovići-Živnice	IPSA INSTITUT DOO	2024
Modification of the preliminary design of tracks and track connections in the Ševarlije terminal Development of the main design of external transport of process	HIFA-PETROL doo	2024
products from TPP "Tuzla" to PK Šikulje -design of new tracks at two locations with a length of approx. 1 km -design and positioning of a fixed (stable) device for maneuvering - selection and installation of a 100-ton truck scale -design and installation of new switches and slips, as well as signaling and devices for the safe movement of railway vehicles during loading and unloading of production products. - design and installation of new stable and pivoting bumpers (crest guard) - creation of the accompanying electrical project for the complete system, which includes power supply, control, lighting, appropriate protection system, etc. - design and definition of work technology for loading, transporting and unloading production products at the site of TE Tuzla - PK Šikulje - Calculation of the necessary capacities and selection of the shunting locomotive for the mentioned tasks	JP Elektrodistribucija dd Sarajevo	2023
Reconstruction of the access road, reconstruction of the industrial railway from Brčko Novo Port and construction of the railway on the section to the crane track	STRABAG	2023
Development of the main design for the rehabilitation of the road crossing in Blažuj	Operator – Terminali Federacije d.o.o. Sarajevo	2022
Conceptual solution for the possibility of the Vareš railway station as a temporary solution for the storage and transshipment of containers loaded with ore concentrates	Eastern Mining d.o.o.	2022
Development of the conceptual and main design for an additional industrial track from the Brčko Railway Station to the Agro-Industrial Complex	BELISAR d.o.o. Brčko	2022
Conceptual solution and preliminary studies for the railway on SEETO route 9a Tuzla-Zvornik - Architectural solution of railway stations - Traffic study - Traffic technology - Preliminary feasibility study - Preliminary environmental impact study - Waste management plan - Multicriteria analysis	Delegation of the Europena Union to BiH	2022
Preliminary design of new line of industry gauge in Brčko district towards factory facility	BELISAR d.o.o. Brčko	2022

Preliminary design of the Vare's railway station as a temporary solution for storage and transshipment of containers with loaded ore concentrates from the company Eastern Mining Preliminary dosign of the railway station Droškovac in Vare's with the definition of track, storage and transshipment capacities for manipulation of containers and access roads for the delivery of ore from the minimal process of the first of Pioče with obtaining the necessary permits Revision of the main design for the construction of a level crossing on the M14 road, location Jablanska Street in Biha6 Study of railway infrastructure optimization in Canton Sarajevo includes the following phases • Volume and structure of passenger traffic (international, intercity, suburban-local) • Volume and structure of railway traffic • Condition of railway capacities • Forecast of the volume and structure of passenger traffic • Forecast of the volume and structure of railway traffic • Capacities of Alipasin Most and Sarajevo Putna • Capacities of Alipasin Most and Sarajevo putna • Capacities of Sarajevo Teretran station • Other railway capacities Capacities of Sarajevo Teretran station • Other railway capacities Capacities of the rounce Alipasin Most-Sarajevo circular railway traffic • Capacities of Sarajevo Teretran station • Other railway capacities Capacities of Sarajevo Teretran station • Calculation of project documentation and study for transport of ore concentrate on the realization Vare's - Luka Ploče • Annual, monthly and calily defining production. • Calculation of transport and trans-shipment trans-shipment machinary • Calculation of transport and trans-shipment costs for different modes of transport o	ID. 4200347270006 • PDV: 4200347270006 • MBS: 63-01-0049-09		
of track, storage and transshipment capacities for manipulation of containers and access roads for the delivery of ore from the mine Tisrovic to the Port of Picôe with obtaining the necessary permits Revision of the main design for the construction of a level crossing on the M14 road, location Jablanska Street in Binac's Study of railway Infrastructure optimization in Canton Sarajevo includes the following phases • Volume and structure of passenger traffic (international, intercity, suburban-local) • Volume and structure of railway traffic • Condition of road capacities • Forecast of the volume and structure of passenger traffic • Forecast of the volume and structure of railway traffic • Accompanying plans in the area of influence of the corridor • Capacities on the route Alipašin Most-Sarajevo Putna • Capacities of the technical station "Sušica" • Capacities of the rechnical station "Sušica" • Capacities of the realization Vares' - Luka Ploče • Annual, monthly and daily defining production. • Calculation of transport and trans-shipment and remainer of project documentation and study for transport of reconcentrate on the realization Vares' - Luka Ploče • Annual, monthly and daily defining production. • Calculation of transport and trans-shipment costs for different modes of transport. • Defining trans-shipment points and types of trans-shipment machinery • Calculation of transport and trans-shipment costs for different modes of transport. • Defining the pointal model The main design of the rail-road crossing "Banlozi" - Zenica on the left bank of the Bosan River via the existing railway line to the state connections	storage and transshipment of containers with loaded ore concentrates from	•	2022

Main design for rehabilitation, reconstruction and modernization of the tram line in Sarajevo on the part from the "S" curve at the Holiday Inn to Ilidža with connection to the Railway Station, turnpike at the railway station, line through Hamze Hume Street and branch of the tram line, for sections: - Cengic Villa - "S" curve - Technical School - Railway Station - UI. Hamze Hume	IPSA Institut d.o.o. Sarajevo	2018 2019
Preliminary design of the industrial railway 760 and 1435 mm from the Banovići station to the Thermal Power Plant and the cement plant The construction of a TPP and Cement plant in the Turia region is planned. For the transportation of equipment and the removal of coal and cement, it is planned to build a normal track along the route of the narrow line from Omazici South to Grivice and from Grivice by leaving the narrow line to the hard stand of TPP and Cement Plant. The start of the normal track at Omazici South Station was adopted as km 0 + 000.00. The end of the draw track at Cementara Station is 10 km + 221.51 km and the length of the new track is L = 10.221 km. The conceptual design of a normal track was made in accordance with the applicable laws, Regulations and standards relating to the area of this project and the Terms of Reference. Regulations 314 of 1989 were used on the parts of the narrow line to be relocated	Coal Mines "Banovići" d.d. Banovići	2018 2020
Rehaul of the track for the transfer of tank wagons as a part of the main — detail design of a complete repair of liquid oil fuel terminal in Živinice. As a part of design of a complete repair of liquid oil fuel terminal in Živinice it was necessary to do rehaul of track for the transfer of tank wagons. The primary goal of rehaul of the track for dispensing of petroleum products relates to the system of discharge of potentially oily waters. All existing elements of the route, both situationally and vertically, as well as existing turns are retained. In the project, the axle is mounted on the right rail, in the direction of arrival of the train at the transshipment point. The length of the reconstruction is 87.48 m, and ends at the bumper. This project envisages minimal regulation of the track in height, with the level of the UPPER EDGE OF RAIL almost equal to 0 ‰.	OPERATOR- TERMINALI FEDERACIJE d.o.o. Sarajevo	2016
Main design of construction and reconstruction of the entrance lyre to the station Kakanj (Phase I) This project is part of project for the Reconstruction and construction of connections of the industrial gauge Vrtilište-Kakanj - directly on the eight gauge of railway station Kakanj and extensions of the 8th gauge to the cement gauge. The project included: Preparation of technical documentation of railway traffic for the project "Construction and reconstruction of the entrance lyre into Kakanj station (Phase I), Main design of the station (Phase II), Surveying of the crossover lyre with a list of permanent points with absolute coordinates and heights (Phase III), Preparation of pre-measures and estimates of works by phases and total	PC Elektroprivreda BiH d.d. – Sarajevo	2016

uoo uo	Preliminary and Main design of industrial track sugar refinery in Brčko		2007

ID. 4200347270000 FDV. 4200347270000 NIBS. 63-01-0043-03		
Preliminary design of rail stop "Tovarište" in the industrial area of Brčko	Studen Agrana Sugar Refinery doo	2007
Main design of industrial tracks in the ArcelorMittal Zenica (project supplement) -Gauge for Wheel loading and shipping of materials K18 -Reconstruction and construction of gauge in front of high stoves on the side of iron outpouring K26, K27 and K28 -Reconstructions of gauge network for unloading ore - receiving bunker, gauge K7 and K8	ArcelorMittal Zenica	2007
Preparation of feasibility study of the transport analysis and receipt and dispatch analysis of goods and technology of railway traffic industrial complex Brčko	Vlada Brčko distrikta	2007
Preliminary design of industrial track Brčko gas gauge, connected to the Sugar Refinery Brčko	Brčko Gas	2007
Consulting services related to the alternatives of building new industrial track Brčko - Brčko Port - Sugar Refinery Brčko	Studen Agrana Sugar Refinery doo	2007
Main design of road crossings in track Sarajevo - Zenica. Crossing with regional and local roads - a total of 11road crossings: Perin Han, Drivuša, Janjići, Slap, Gora, Kakanj, Čatići, Poriječani, Visoko, Banjer i Podlugovi	Aidia Inženjering according to the rules of international tender EIB-BHRPC S1/08/2003	2007
Main design of construction of the industrial track of the old iron warehouse Kapija V in Zenica The connection to the industrial track of MITTAL STEEL and the Old Iron Wearhouse has been retained, i.e. the existing connection is retained by this project. At the road crossing in front of the Gate of the Warehouse, the crossing is rehabilitated, and behind the gate within the Warehouse, at the distance of about 5 m from the gate, a new junction number 1, type arch 49-215-11° 46′06 ", is placed. By installing this type of switch, maximum axle retention of the existing track was achieved and separation as much as possible to the right of the new unloading / loading track, or in order to satisfy the required conditions of position of the track axis at the unloading / loading point. Switches number 2 and number 3 are simple 49-180-7°. The track design track was adopted so that the start of turn number 1 was adopted as km 1 + 000,00. Within the scope of the Warehouse, three tracks are designed as follows: - Unloading track No. 1. useful length = 252.70 m - Maneuvering ring road 2. useful length = 148.87 m. - Weighing the wagons and malfunctions - gauge number 3. useful L=143,67 m. - Draw track L = 38.50 m.	ArcelorMittal Zenica	2007

-Traffic projects-

Project description	Investor	Year
Study of temporary traffic regulation on the local road above the Kobilaj Glava tunnel on section I of the transversal	EUROASFALT	2024
Study of temporary traffic regulation on the bridge over the Ljuvina River (M18-009-397) on the M18 road, section Olovo-Semizovac, km 39+201	SIKRA DOO	2024
Study of temporary traffic regulation on the bridge over the Jelašje stream (M17-012-307) in Donji Paparski, on the M17 highway, section Konjic-Jablanica 1, km 17+923	SIKRA DOO	2024
Revision of traffic equipment and signaling projects on the main project Analysis and adaptation of existing projects of the Motorway on Corridor Vc and Creation of an innovative Main project, sections Putnikovo Brdo-Karuše and Karuše-Medakovo, L=8.5 km (Amendment and addition of the project on part of the route km 3 +220.00-km 4+895.65) - Project of horizontal highway traffic signalization, CP - Project of vertical traffic signaling of the highway, CP - Traffic equipment projects - protective barrier (safety) fence and shock absorbers - Traffic equipment project - protective wire fence - Noise protection project	ENCOS d.o.o. Sarajevo	2024
Study of temporary traffic regulation on the Komar bridge	SIKRA DOO	2023
Study of temporary traffic signals at the construction site connection for the needs of road construction on Corridor Vc, Medakovo-Ozimica section	CENGIZ INSAAT SANAYI VE TICARET A.S.	2023
The main project of expanding the parking lot for passenger vehicles at PR "MAT" D.O.O traffic phase	PR International airport Tuzla	2023
Development of the Main design of the Ozimica-Poprikuša section of the highway (Zepče South), length L=11.99 km TRAFFIC EQUIPMENT AND SIGNALING Traffic equipment project - protective barrier (safety) fence and shock absorbers, text part and draft Traffic equipment project - protective wire fence, text part and blueprint Traffic predefined scenario	PC Motorways of FBiH	2021
Traffic Management Plan for the project "Construction of the section Miljkovići - Rodoč-connection with M17, Tunnel Novi	STRABAG D.O.O.	2021
Traffic Management Plan during the execution of works on the section of the motorway on the corridor Vc, Mostar South - Buna	STRABAG D.O.O.	2021
Preparation of Temporary Traffic Signaling Projects during the works on the replacement of transition devices on the bridges on the A1 motorway as well as on the section A1 Kakanj - Sarajevo 1. Bridge arm 1 loop Zenica 2.Tunnel 1.March loop Lašva 3. Bridge MO "6" - left side of the highway and	STRABAG D.O.O.	2020
4. Bridge MO "5" - right side of the highway Study of the research of the multidimensional impact of traffic on the environment of the City of Sarajevo within which the following activities were performed: • Development of methodological basis and documentation basis for the study • Overview of the multidimensionality of transport and the environment • Detailed review of legislation in BiH, as well as in the scope of study research • Collection of data on relevant indicators of the environmental aspect of the impact of traffic in the municipalities of Stari Grad, Centar, Novo Sarajevo and Novi Grad • Analysis of the impact of traffic on air quality in the field of study research • Analysis of the impact of traffic noise on the environment • Analysis of the impact of vibration caused by tram and road traffic in the City of Sarajevo • Research - visual degradation of space and green urban areas • Conclusions and proposals for systemic measures	ENVIRONMENT PROTECTION FUND	2020
